SKULBASE USER GUIDE

Class teacher guide

For teachers who are responsible for a class

How to enter and correct marks, keep your class's register and follow its attendance, look after your class list, produce report cards, set homework, upload exam papers, keep schemes of work, assess CBC strands, and use the calendar, timetable, leave and store requests.

Contents

1. Getting started

- Activate your account with an invite code
- Sign in
- Finding your way around

2. Your dashboard

- Reading your dashboard

3. Exams and marks

- Enter or correct marks
- Using the mark sheet
- Upload marks from a spreadsheet or a photo
- Release results to learners
- See a class's results

4. Your class

- Take the daily register
- Attendance reports
- My Students
- Report cards for your class

5. Homework and announcements

- Set homework and mark it
- Post announcements

6. Exam papers, schemes and CBC

- Upload an exam paper for moderation
- Schemes of work, lesson plans and records of work
- CBC assessment
- Report a discipline incident

7. Calendar, leave and requests

- The school calendar
- Your timetable
- Apply for leave
- Ask the store for supplies
- Ask for money to be spent

8. On your phone

- Using Skulbase on a phone

9. Getting help

- Where to get help

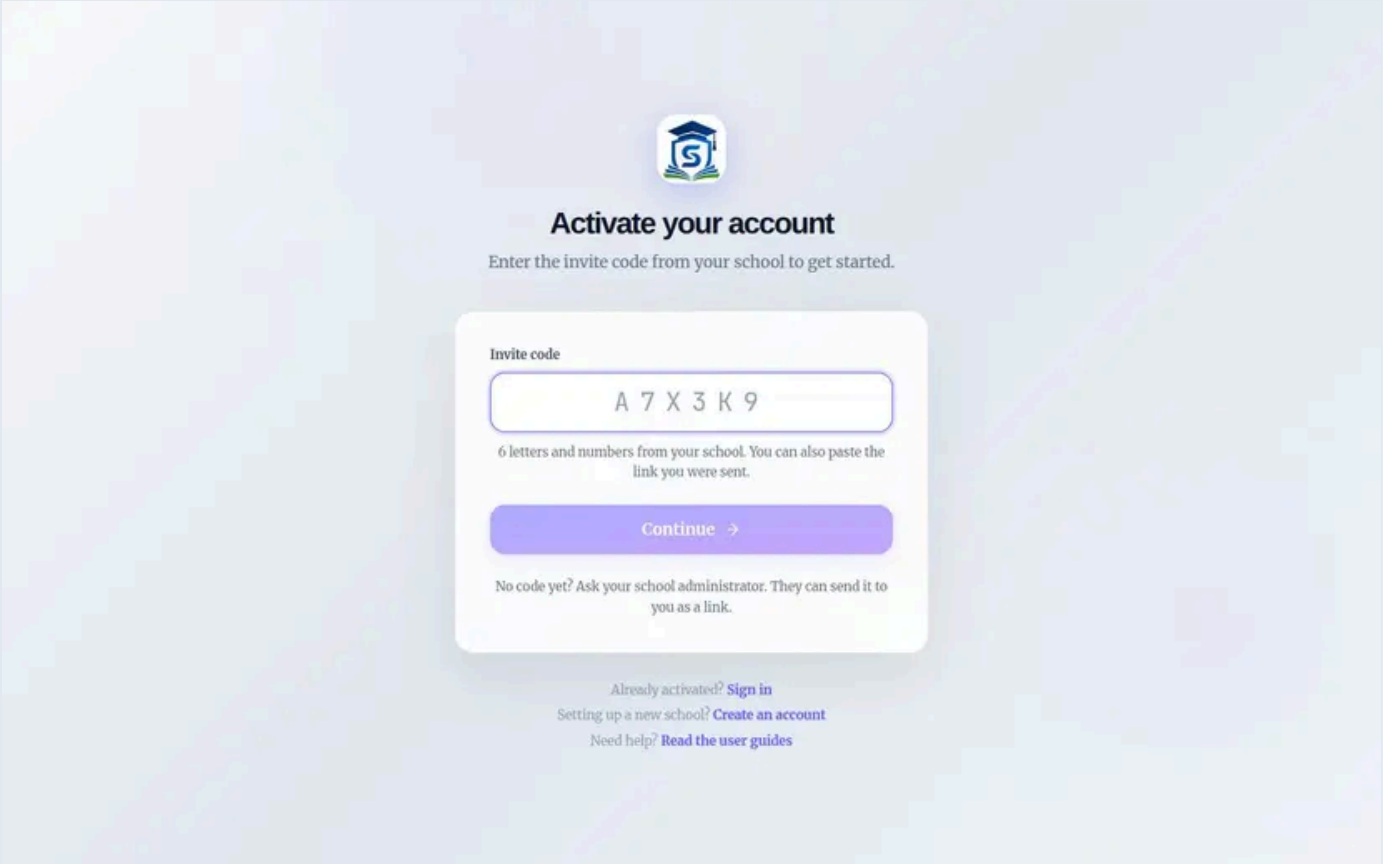

CHAPTER 1

Getting started

Your school administrator creates your account and gives you an invite code. You activate it once, then sign in with your username or email.

1.1 Activate your account with an invite code

Teachers, staff and learners do not sign up on their own. Your school adds you, and you get a personal invite code (or a link that has the code in it) to set up your login.

Activating an account: type the invite code from your school, or open the link they sent you.

1. **Get your code**
   Your school administrator gives you a six-character invite code, for example A7X3K9, by SMS, WhatsApp, on paper, or as a link. The code only works for your account.

2. **Open the activation page**
   Tap the link you were sent, or go to skulbase.com, choose Sign in and then “Activate your account”. If you opened a link, the code is already filled in.

3. **Check it is you**
   Press Continue. Skulbase shows the name the school registered. If it is not you, choose “Not you?” and ask the school for the right code.

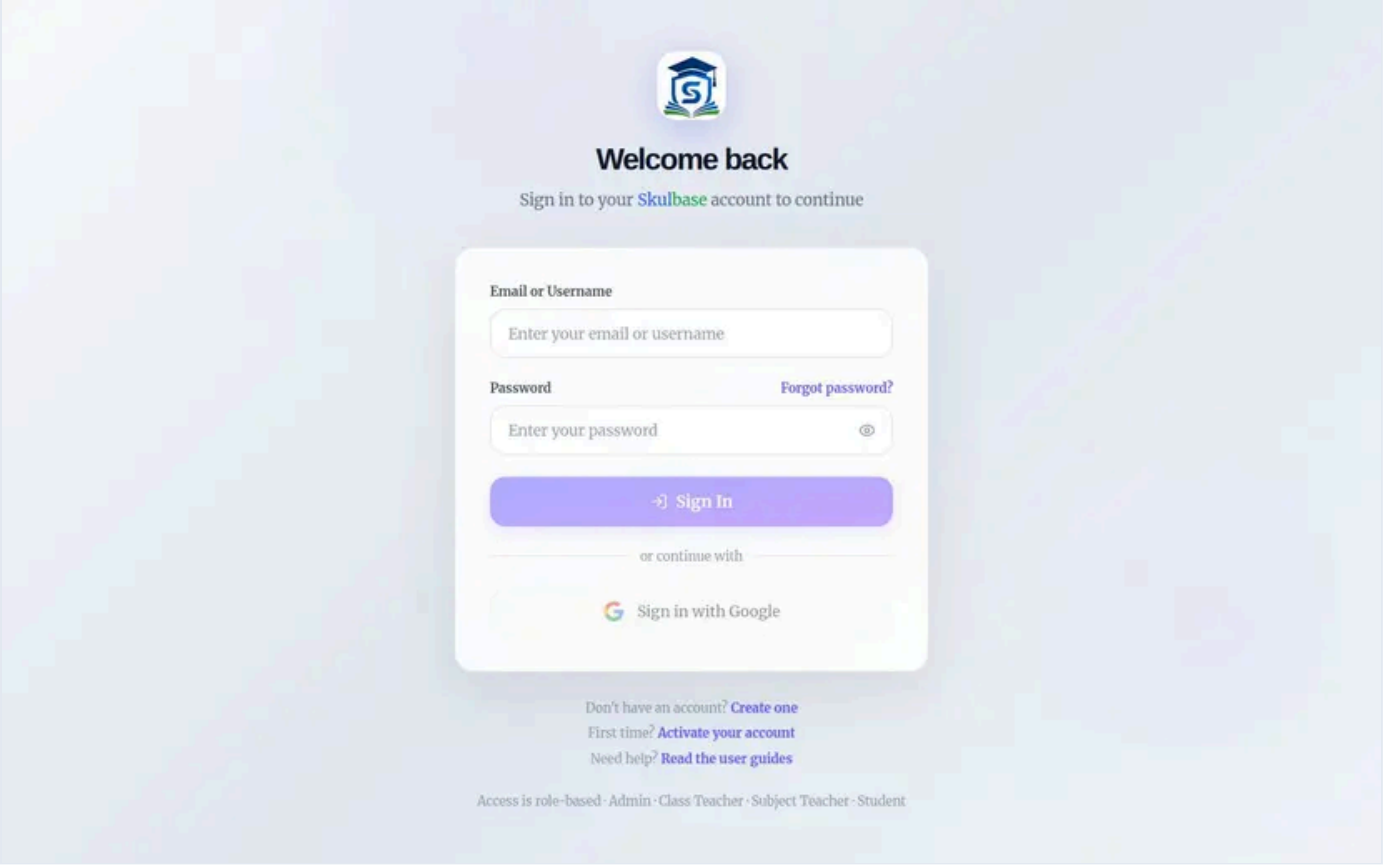

4 **Choose how you will sign in**
Pick a username (one is suggested for you) and a password of at least 8 characters, or continue with Google. Adding an email address lets you reset your password yourself later.

5 **You are in**
You are signed in straight away and land on the home page for your role.

⚠ **Good to know:** Each code can be used once. If yours says it has expired or was already used, ask your administrator to reset your account; they get a fresh code in seconds.

1.2 Sign in

Once your account is active, sign in with your email address or username and your password, or with Google if you activated with Google.

The sign-in page. “Forgot password?” sends you a code by email.

1 **Go to the sign-in page**
Open skulbase.com and choose Sign in.

2 **Enter your details**
Type your email address or username, then your password, and press Sign In. Or press “Sign in with Google”.

3 **Forgot your password?**
Choose “Forgot password?”, enter your email address, and type the six-digit code we email you along with a new password. This also works if you have only ever used Google, and afterwards both ways work.

Tip: Save skulbase.com to your phone’s home screen. It opens like an app and remembers you are signed in.

1.3 Finding your way around

The menu only shows the pages your role can use. On a computer it runs down the left-hand side; on a phone the main pages sit in a bar along the bottom.

- On a computer, the arrow at the top of the menu makes it narrower (icons only) or wider (icons and names). Skulbase remembers your choice.
- Press the / key, or tap “Search menu”, to jump to any page by typing part of its name.
- Your name at the bottom of the menu opens your account menu: switch between light and dark appearance, or sign out.
- If you hold more than one role (for example an administrator who is also a class teacher), use “View as” in the account menu to switch views.
- On a phone, the bottom bar shows your four most-used pages. Everything else is under More.

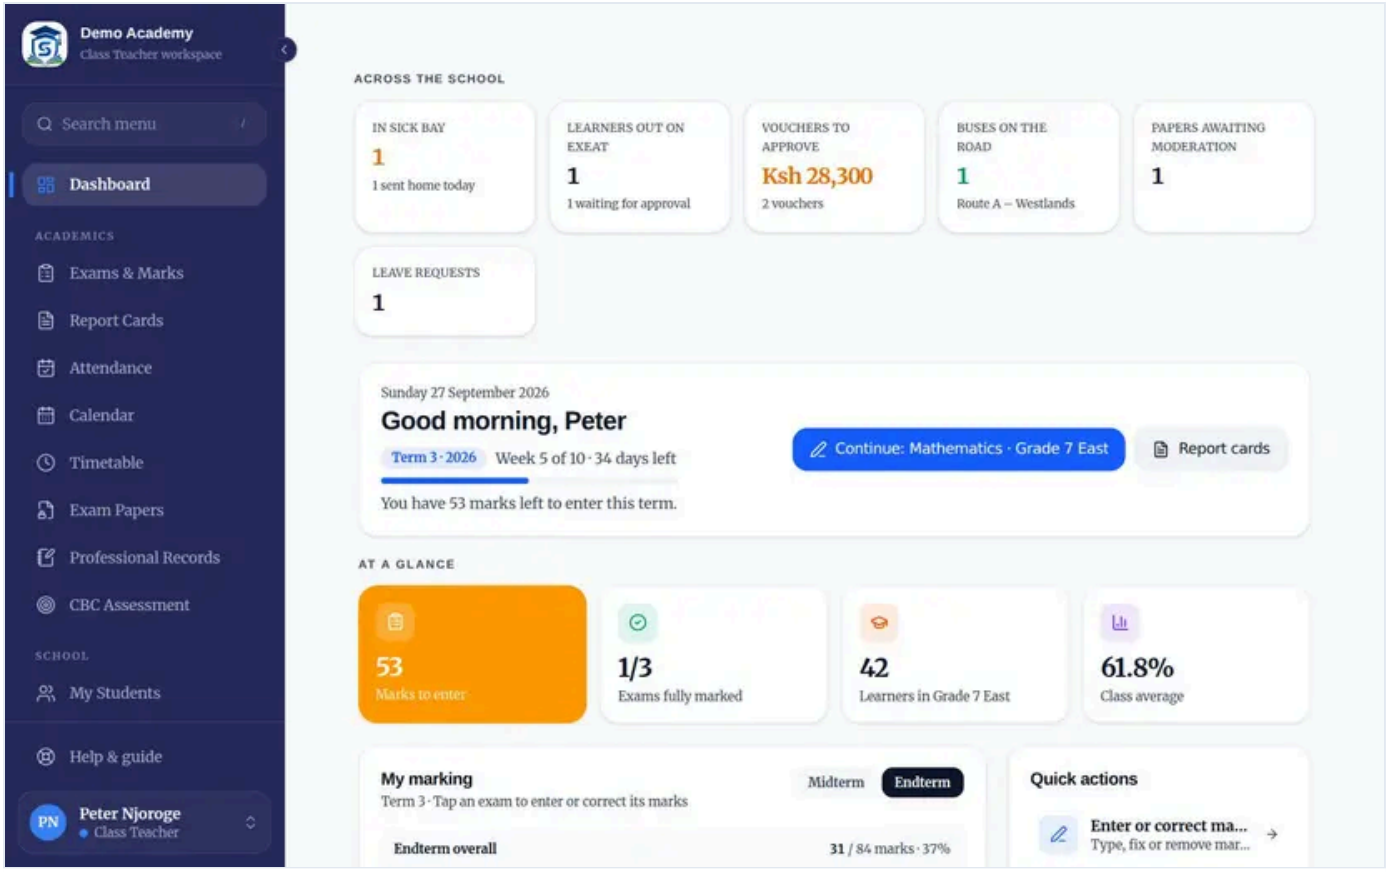

CHAPTER 2

Your dashboard

Your dashboard leads with the job that matters most in a term: getting marks in.

2.1 Reading your dashboard

The top shows where the school is in the term and how many marks you still have to enter. The big button takes you straight to the next mark sheet to finish.

A class teacher's dashboard.

- "Continue: Mathematics · Grade 7 East" opens the exam you were part-way through, or the next one to start.
- At a glance: marks still to enter, exams fully marked, learners in your class, and your class average.
- My marking lists every exam you enter marks for this term, with how many learners are marked. Tap one to open its mark sheet.
- Quick actions open marks, class results, report cards, attendance and your class list. "Coming up" shows exams in the next three weeks.
- If report cards are still to be generated for your class, a reminder appears on the right.

CHAPTER 3

Exams and marks

Entering marks is the main job in Skulbase. Your school chooses which exam each class is marking, so you pick the class and subject and the right mark sheet opens. You only see the classes and subjects your administrator has assigned to you; if one is missing, ask them to add it on the Subjects page.

3.1 Enter or correct marks

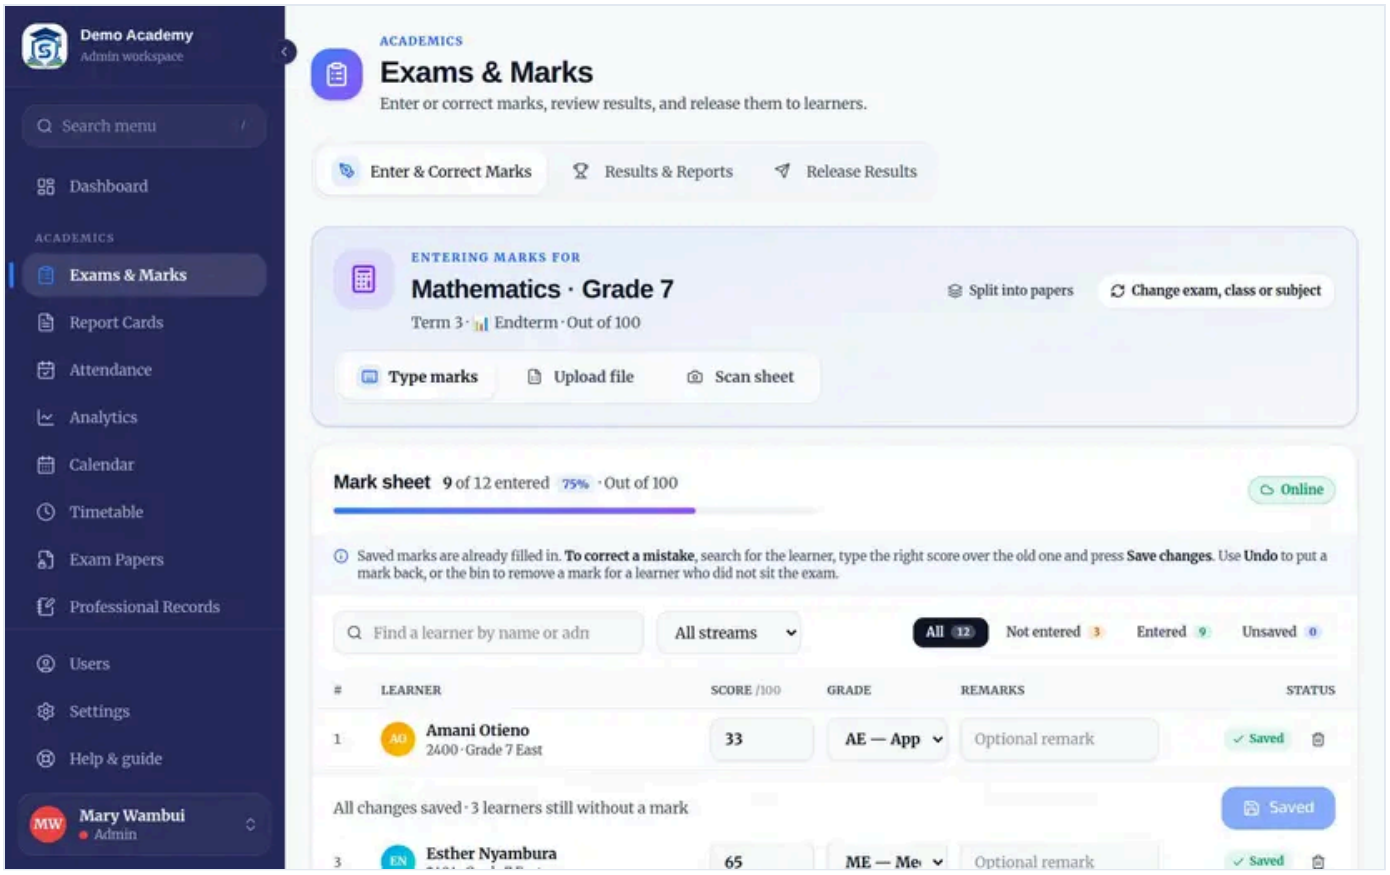

Marks go in on Exams & Marks, on the “Enter & Correct Marks” tab. The school chooses which exam each class is marking, so you only pick the class and subject: the mark sheet opens on the right exam and your marks cannot land in the wrong one.

1. **Open Exams & Marks**
   Choose Exams & Marks in the menu. The “Enter & Correct Marks” tab is open.
2. **Pick up where you left off**
   If you were part-way through a sheet, “Pick up where you left off” at the top opens it again.
3. **Choose the class and subject**
   “Marking now” lists each of your classes with the exam it is on (for example End-Term) and your subjects there. Pick the class, then the subject. You only see the classes and subjects you teach.
4. **Open the mark sheet**
   The sheet opens on the exam your school is marking, with a badge naming it. Saved marks are already filled in.

- No exam open for a class yet? It shows “No exam open yet”. Press “Ask for the exam”: your administrator, principal or DOS sees the request and opens the right one.
- To mark a CAT, correct an earlier exam or work in another term, press “Mark a CAT, correct an earlier exam or open another term” and choose the term, exam, class and subject yourself. A sheet also lists “Other exams for this class” to jump between them.
- If you open an empty sheet for an exam the school is not marking, Skulbase asks you to check which exam the marks are from before you start.

3.2 Using the mark sheet

The mark sheet lists every learner with a box for their score. The grade fills itself in from your school’s grading system.

The mark sheet: type a score, press Enter to move to the next learner, then Save changes.

1. **Type the scores**
   Click the first score box, type the mark and press Enter to jump to the next learner. The grade appears as you type. Remarks are optional.

2. **Save**
   Press “Save changes” at the bottom. The bar tells you how many learners still have no mark.

3. **Correct a mistake**
   Find the learner with the search box, type the right score over the old one, and save. Undo puts a mark back as it was; the bin removes a mark for a learner who did not sit the exam.

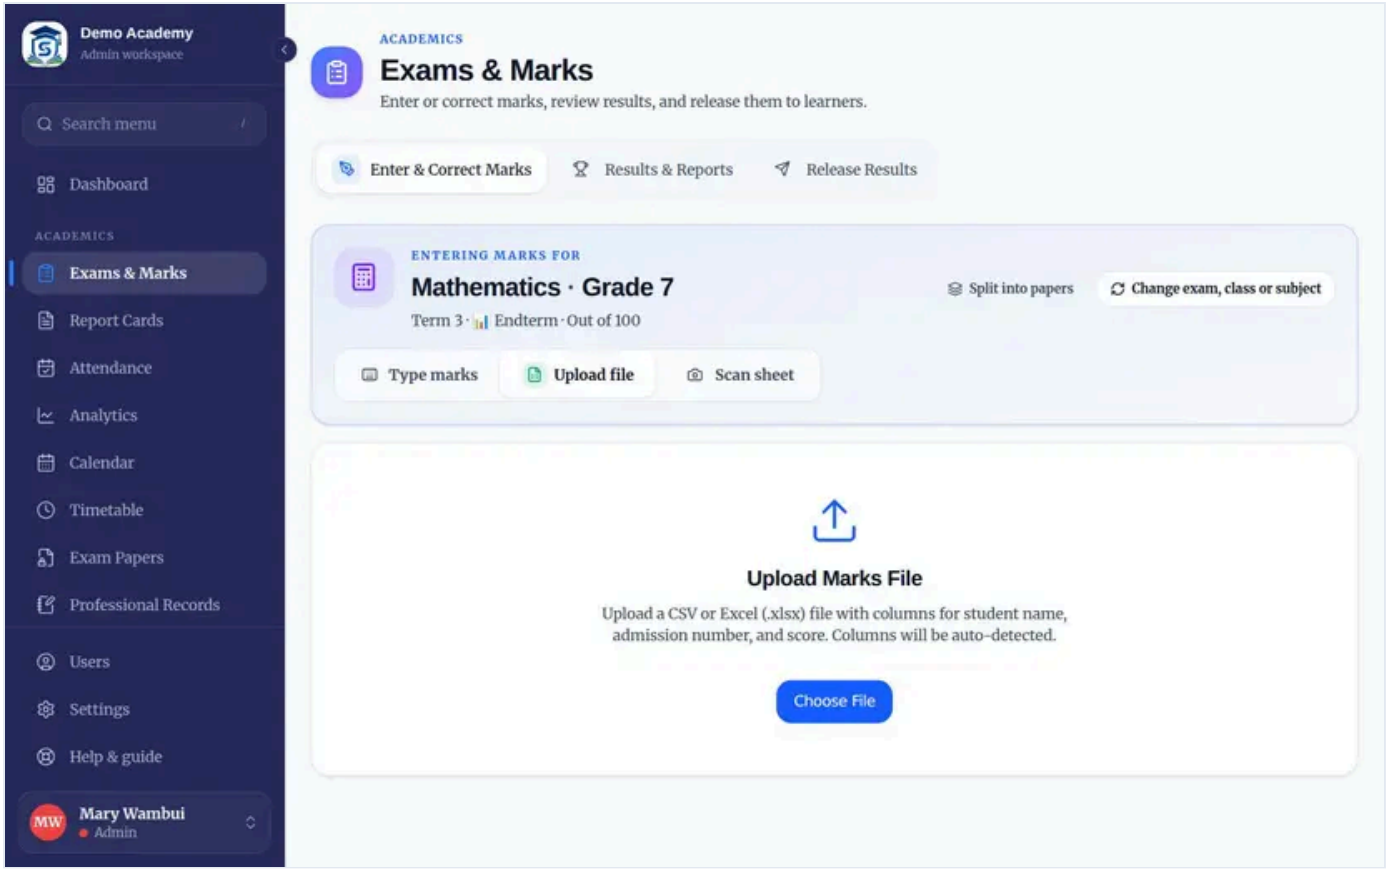

4. **Filter the list**
   Use the tabs (All, Not entered, Entered, Unsaved) and the stream filter to find who is left.

- “Online” at the top right shows the sheet is connected. If the network drops, your typing is kept on this device and saved when you are back online.
- Scores are out of the exam’s maximum (shown at the top, for example “Out of 100”).
- A subject with several papers can be split with “Split into papers”; each paper then gets its own column and the final mark is worked out for you.
- Once every learner on the sheet has a saved mark, the sheet offers to release the results there and then, so learners and parents can see them. You can still correct a mark afterwards.

- “Change history” at the bottom lists every mark entered, changed or removed on the sheet: the old and new score, who saved it and when. The search box narrows it to one learner.
- When the school locks a finished term, its sheets say so and cannot be saved. Ask whoever runs exams to unlock it for a correction.

3.3 Upload marks from a spreadsheet or a photo

Instead of typing, you can upload an Excel or CSV file, or take a photo of a handwritten mark sheet.

“Upload file” reads marks from Excel or CSV; “Scan sheet” reads a photo of a paper mark sheet.

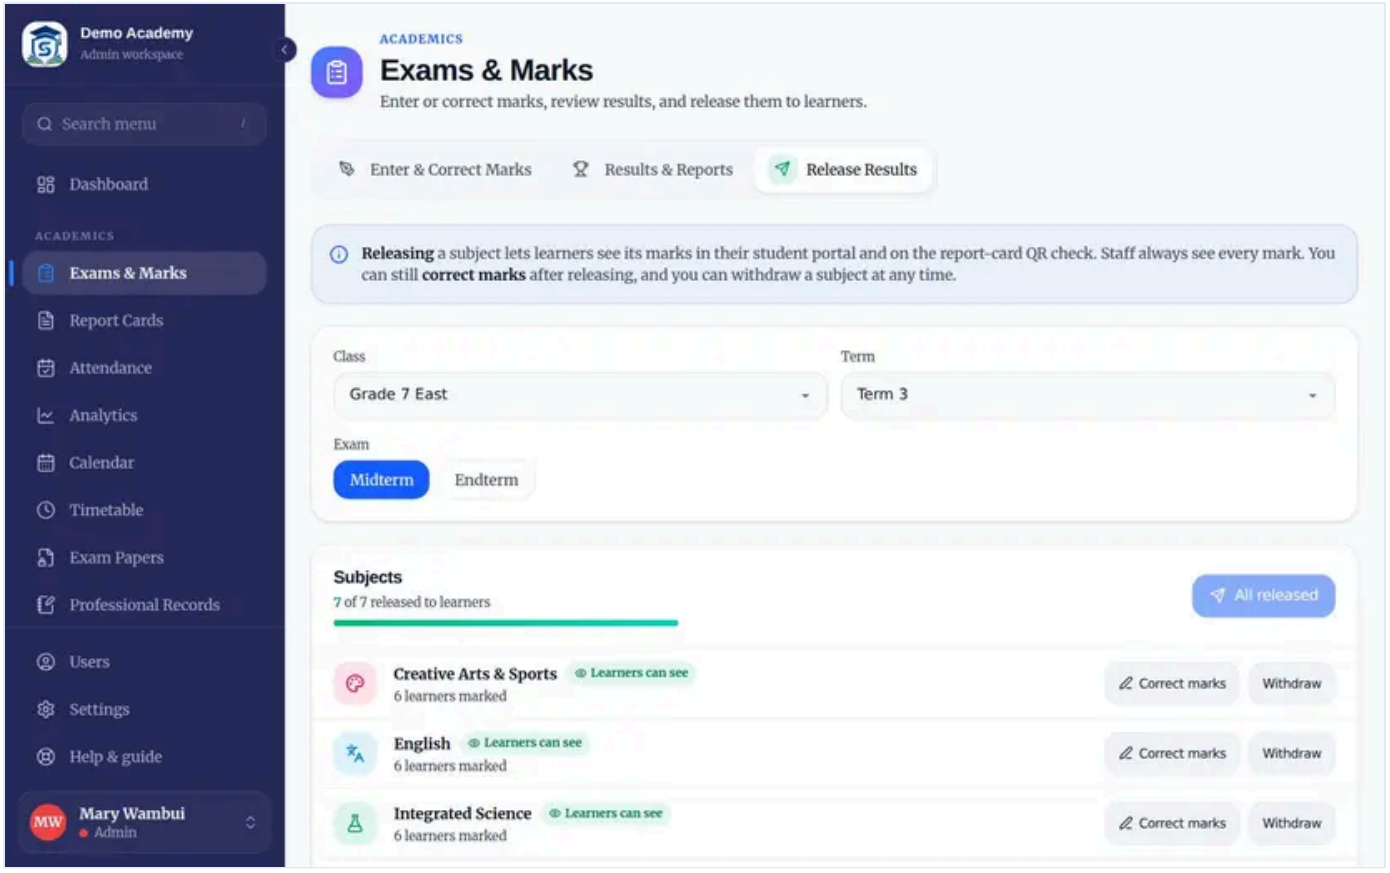

1. **Upload a file**
   On the mark sheet choose “Upload file”, pick your Excel or CSV file, and check the columns Skulbase detected (learner, admission number, score). Press “Validate & Preview”, check the rows, then save.

2. **Scan a paper sheet**
   Choose “Scan sheet” and take or upload a clear photo. Skulbase reads the names and scores; check every row, fix anything misread, and confirm. Nothing is saved until you confirm.

> **Tip:** Admission numbers are the most reliable way to match rows to learners. Keep them in your spreadsheet.

3.4 Release results to learners

Marks stay private to staff until they are released. Releasing a subject lets learners see its marks in their portal and on the report card's QR check.

Release Results: each subject shows how many learners are marked and whether learners can see it.

1. **Open the Release Results tab**
   On Exams & Marks choose "Release Results". "Ready to release" at the top lists every paper this term that has its marks in and is not yet released, grouped by class and exam, each group one click from released.

2. **Choose the class, term and exam**
   The list shows every subject for that exam and how many learners have marks.

3. **Check the ranking preview**
   Scroll down to see the class ranking the release would produce, and any learners with missing papers (a missing paper counts as 0).

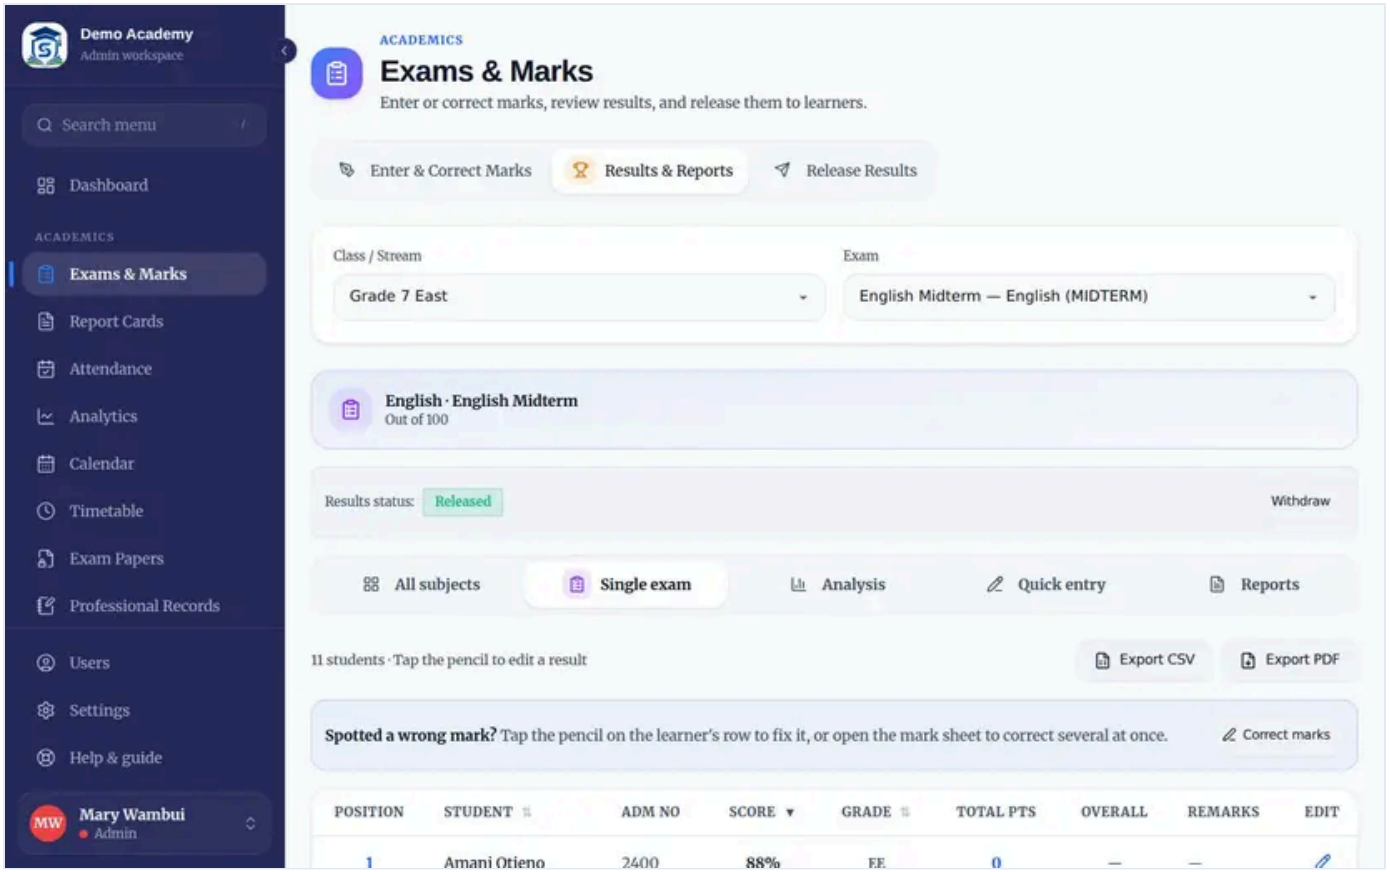

4 **Release**

Release a single subject, or all of them at once. Released subjects show “Learners can see”.

- You can still correct marks after releasing; learners see the corrected mark.
- A finished mark sheet also offers to release its subject on the spot.
- “Withdraw” hides a subject from learners again at any time.

3.5 See a class’s results

The “Results & Reports” tab on Exams & Marks shows how a class did: every subject side by side, one exam at a time, the analysis, and individual report cards.

Results & Reports: choose a class, then an exam, to see its results.

- Choose a class. “All subjects” is the broadsheet and rankings, with its own term and exam choice.
- For one subject, choose the term (the current one is selected), the exam and the subject. It opens on the exam the school is marking for that class, and each subject shows whether it is released.
- “Correct marks” opens that paper’s mark sheet on Enter & Correct Marks.
- Click a learner to download their PDF report card. Whole-class report cards are on the Report Cards page.

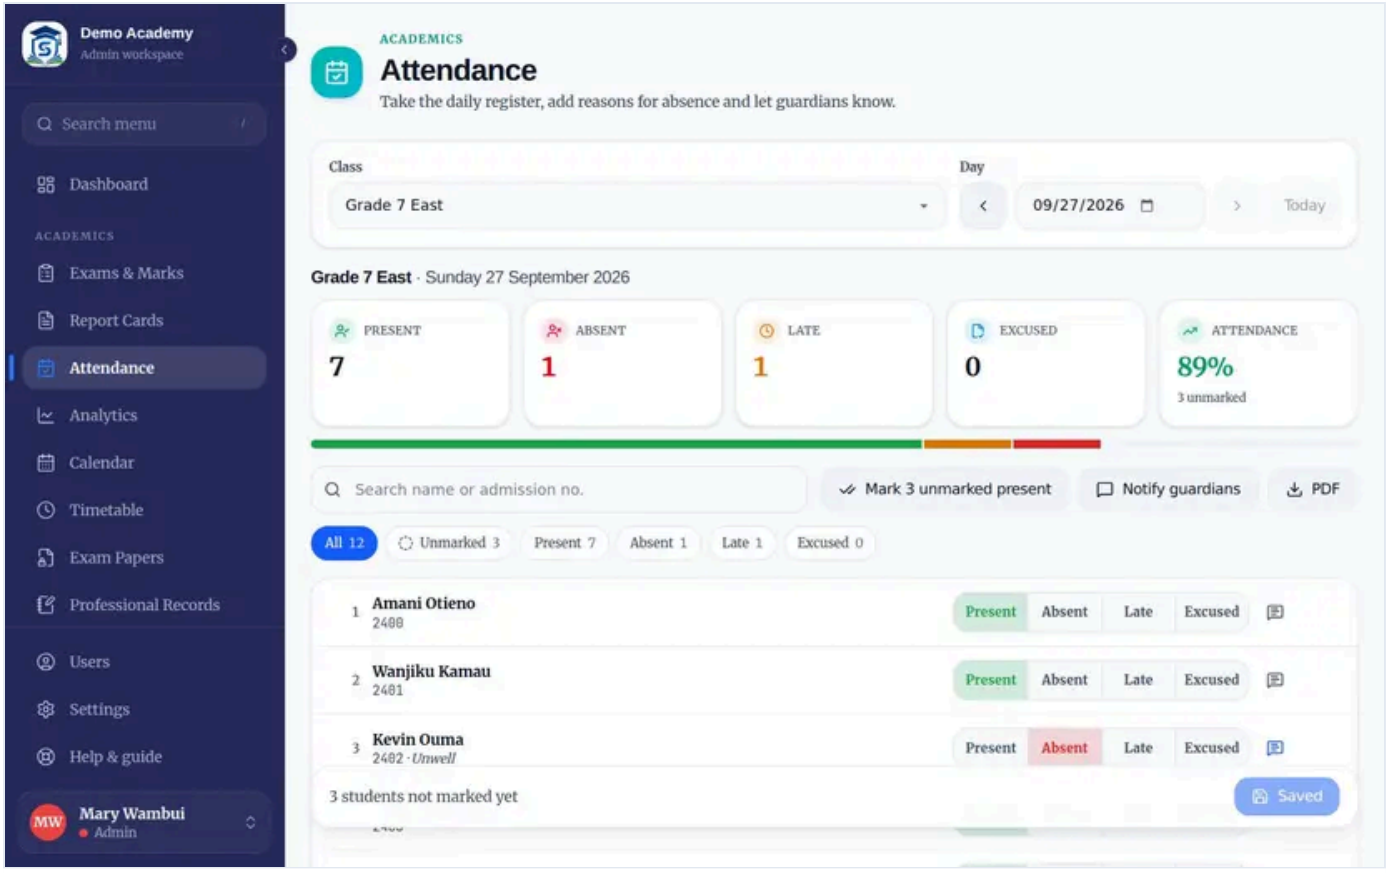

CHAPTER 4

Your class

As class teacher you keep the register and the class list, follow up learners who are often away, and produce your class's report cards.

4.1 Take the daily register

Attendance holds one register per class per day. On the Register tab, mark each learner Present, Absent, Late or Excused, add a reason if you like, and let the parents of absent learners know by SMS.

The register: totals at the top, one row per learner, and a Save bar at the bottom.

1. **Open Attendance**
   Choose Attendance in the menu. The Register tab is open. A class teacher's own class opens straight away; otherwise pick the class.

2. **Check the day**
   Today is selected. The arrows step to the previous or next school day, skipping weekends; the date box picks any day. A weekend day is flagged if you choose one.

3. **Mark each learner**
   Tap Present, Absent, Late or Excused on each row. To save time, press "Mark N unmarked present" and then change only the exceptions.

4. **Add a reason (optional)**
   The note icon at the end of a row adds a reason, such as “Unwell”. It shows under the learner’s name.

5. **Save**
   Press Save at the bottom. Unsaved changes are kept if you switch class or day by mistake: you are asked first.

6. **Tell parents**
   Press “Notify guardians” to text the parents of every learner marked absent: every linked parent and the number on the learner’s record. You see who will be texted before anything is sent, and nobody is texted twice for the same day.

> **Tip:** PDF downloads the day’s register for printing or filing.

4.2 Attendance reports

The Reports tab shows one class over a period: the class’s attendance rate, how many registers were taken, and which learners attend less than 85% of the time. Administrators can choose any class; class teachers see their own.

1. **Choose the class and period**
   Pick the class, then This week, This month, Last 30 days or Last 90 days, or set your own dates (up to 120 days).

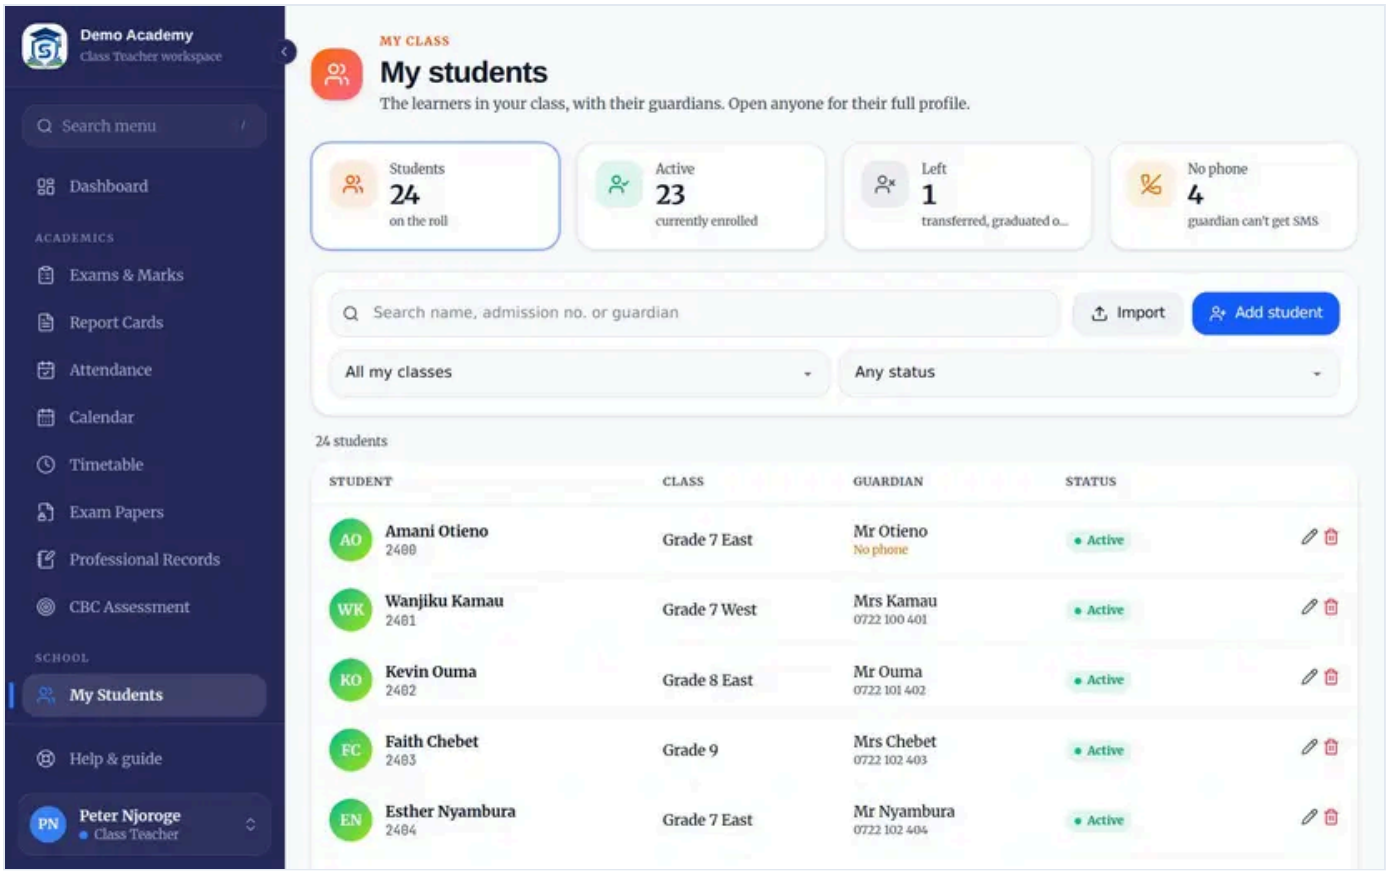

2. **Read it**
   Learners are listed lowest attendance first, each with their rate, absent, late and excused days, and a small square for every day the register was taken. Tick “Only below 85%” to see just the learners to follow up.

3. **Export**
   “Excel” downloads the same grid: one column per day with P, A, L or E, the totals and each learner’s rate.

> **Tip:** A day counts only if the class’s register was taken that day. A learner left unmarked on a day the register was taken counts as not marked, not absent.

4.3 My Students

My Students is your class list: every learner in your class, with their admission number, guardian and contact details. Search by name, admission number or guardian.

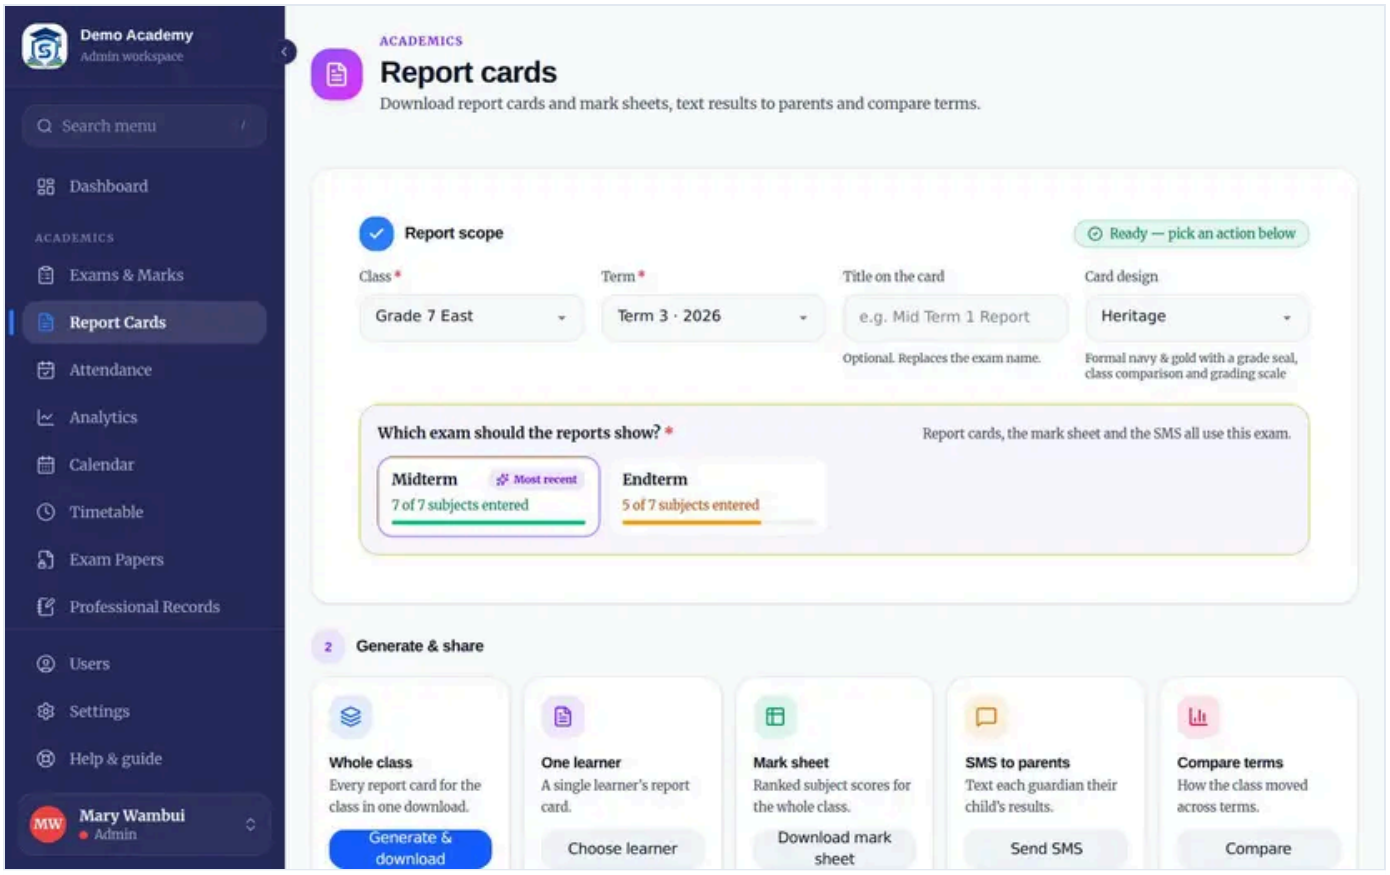

My Students: your own class only.

> **Tip:** If a learner is missing or in the wrong class, or a guardian's phone number has changed, ask your administrator to update their record. Correct phone numbers make sure SMS results and absence notices arrive.

4.4 Report cards for your class

On Report Cards, choose your class, the term and the exam, then download every card, one learner's card or the mark sheet.

Report cards: choose the class, term and exam, then an action.

1. **Choose the scope**
   Pick your class and the term, and optionally a title and card design.
2. **Choose the exam**
   Each exam shows how many subjects have marks. Make sure all subjects are in before printing.
3. **Add your comments**
   Under “Comments on the cards”, write a class teacher remark for each learner (for example “Excellent progress this term”). They print on the cards.
4. **Download**
   “Generate & download” produces every card in one PDF; “Choose learner” produces one; “Download mark sheet” gives the ranked class list.

- Sending results to parents by SMS is done by an administrator.
- After learners move up a class, last year’s cards still print: choose last year’s term and your class as it was then.

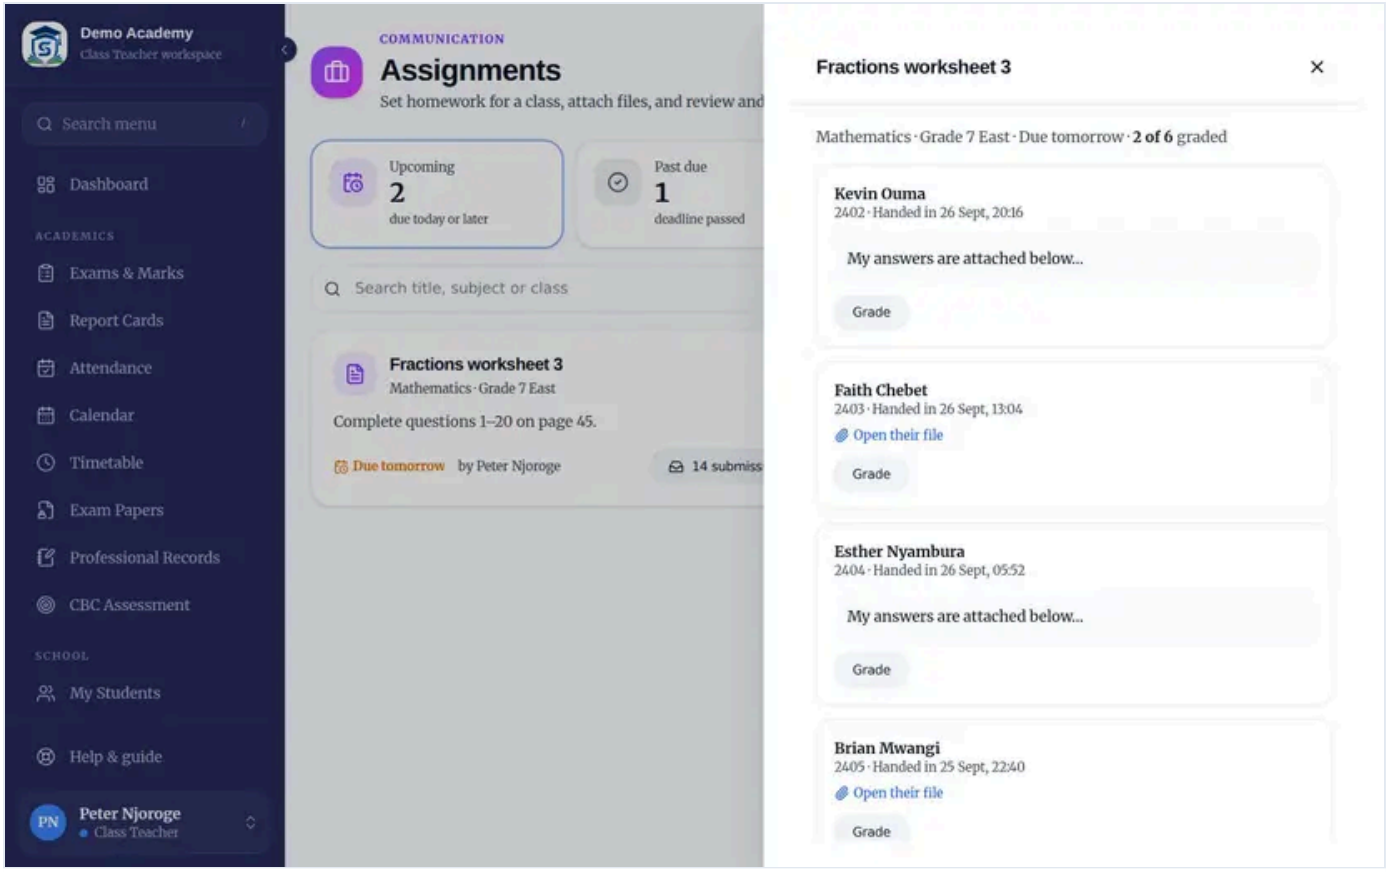

CHAPTER 5

Homework and announcements

Set homework for your classes, mark what learners hand in, and post notices.

5.1 Set homework and mark it

Assignments is where homework is set for a class. Learners see it on their dashboard, hand it in there (typed or as a file), and you grade it here.

Open an assignment's hand-ins to read each learner's work and grade it.

1. **Set an assignment**
   Press "New assignment". Choose the class and subject, give it a title and a due date, add instructions, and attach a file (up to 10 MB) if you like.

2. **Follow progress**
   The tiles at the top filter to Upcoming, Past due, Set by me and All. Each card shows how many learners have handed in.

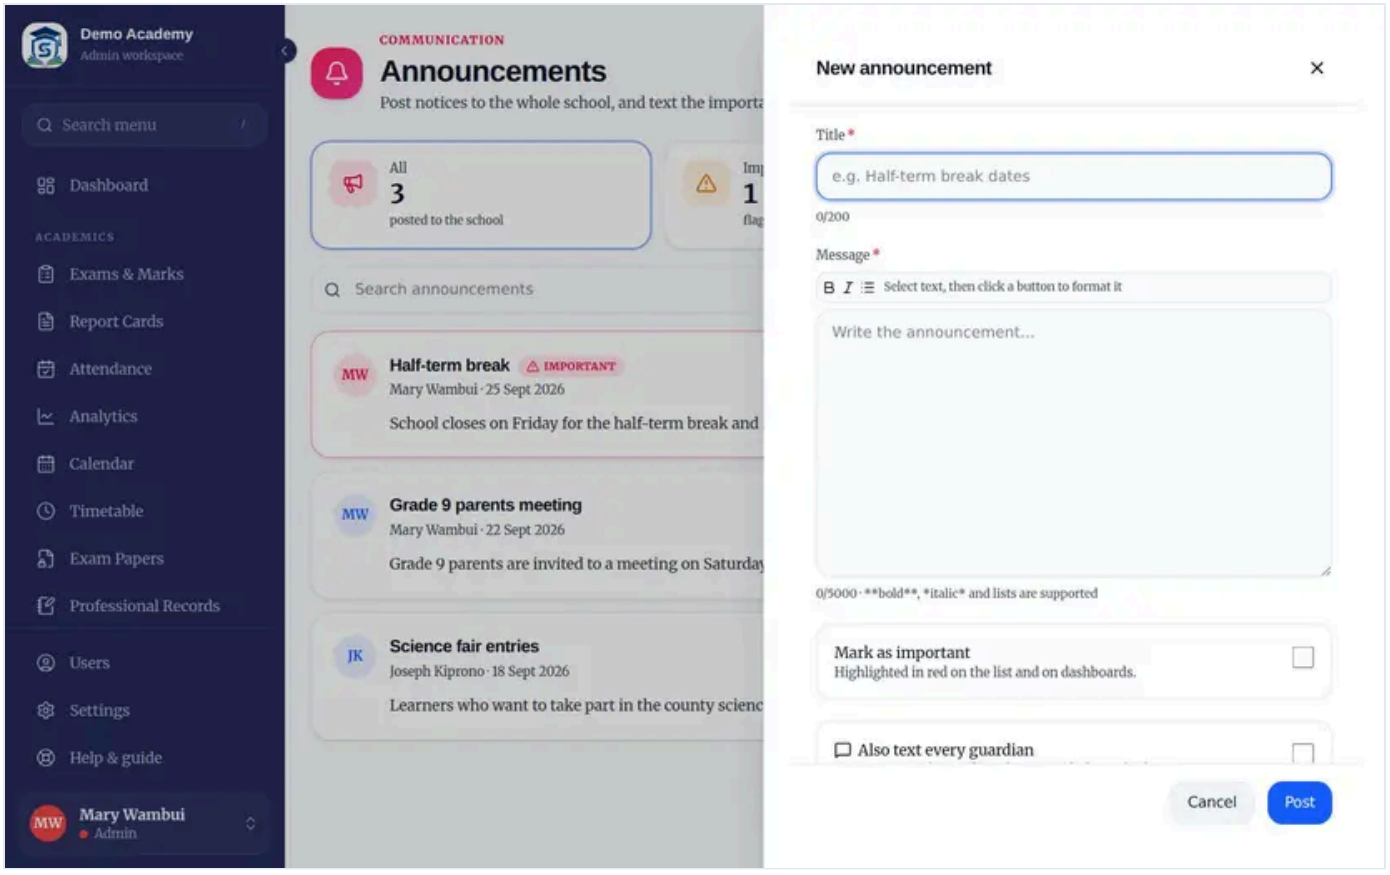

3. **Mark the work**
   Open the hand-ins, read each learner's answer or open their file, and give a grade from 0 to 100 with optional feedback. Learners see the grade and feedback on their dashboard.

- Work is due at the end of the due date, not at midnight before it.
- Teachers can edit and grade only the assignments they set; administrators can manage all of them.

- Once you have graded a hand-in, the learner can no longer replace it.

5.2 Post announcements

Announcements are notices for the whole school. They show on the Announcements page and on learners' dashboards.

A new announcement: a title, the message, and whether it is important.

1. **Start one**
   On Announcements press "New announcement".
2. **Write it**
   Give it a short title (for example "Half-term break dates") and the message.
3. **Mark it important (optional)**
   Important announcements are highlighted in red on the list and on dashboards.
4. **Post**
   Press Post. You can edit or delete your own announcements later from the list.

- Search, or filter to Important or to the ones you posted.
- Only administrators can text an announcement to guardians. Ask your administrator if something needs to go out by SMS.

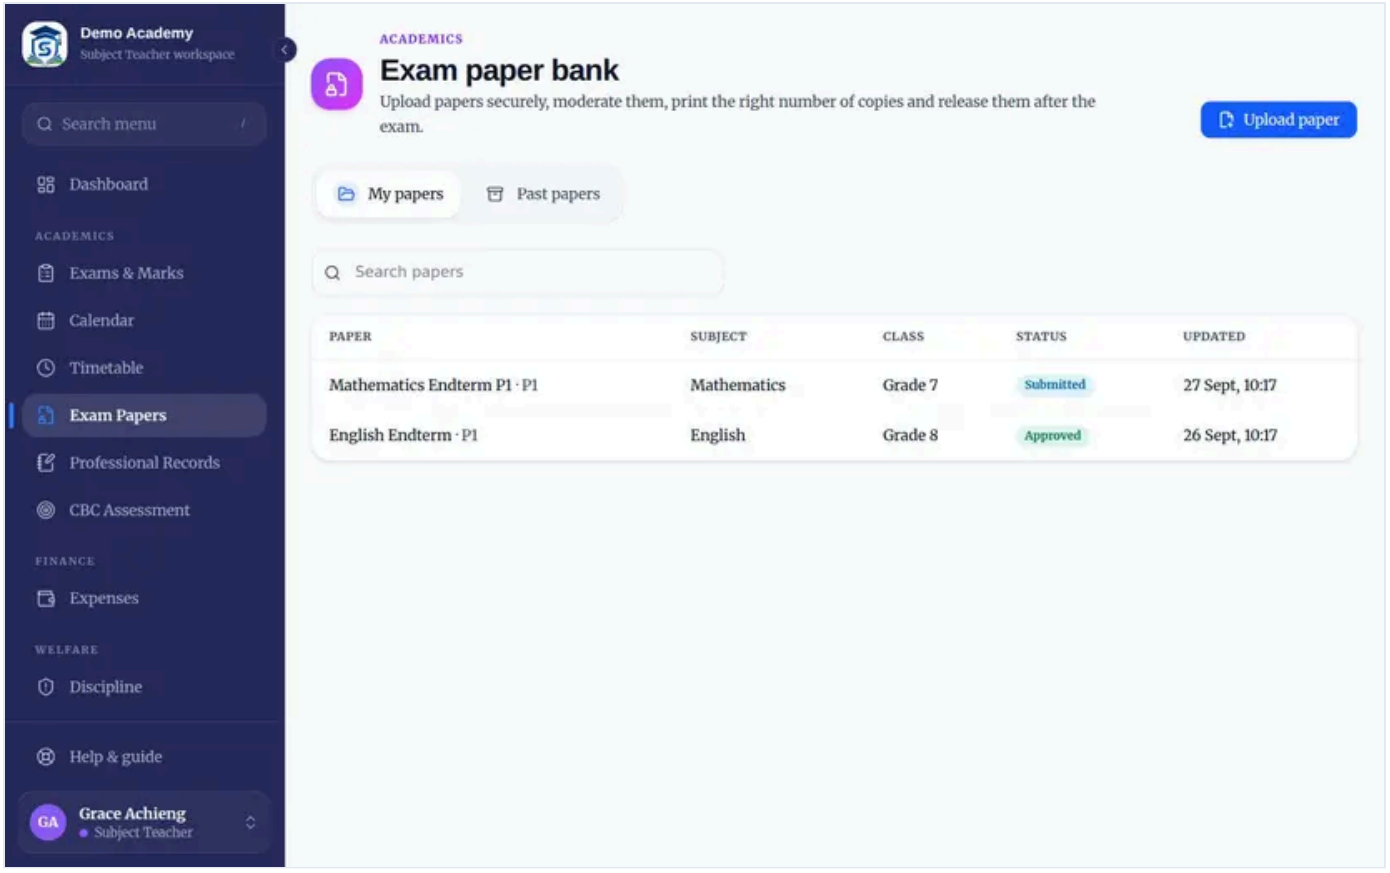

CHAPTER 6

Exam papers, schemes and CBC

Setting papers, keeping professional records and assessing CBC strands. You only see a page if your school has switched its module on and your role or duty uses it. If something here is missing from your menu, ask your administrator.

6.1 Upload an exam paper for moderation

The Exam paper bank keeps exam papers safe until the exam. You upload your paper, your head of department moderates it, the exams office prints it, and it is released after the exam.

Exam papers → My papers: every paper you set and where it is in moderation.

1. **Upload**
   Press “Upload paper”. Give it a title (for example “End of Term 2 Mathematics”), choose the subject, class level and term, the paper label (P1, P2), how many copies are needed, and when it may be released after the exam. Attach the paper (PDF or Word) and, ideally, the marking scheme.

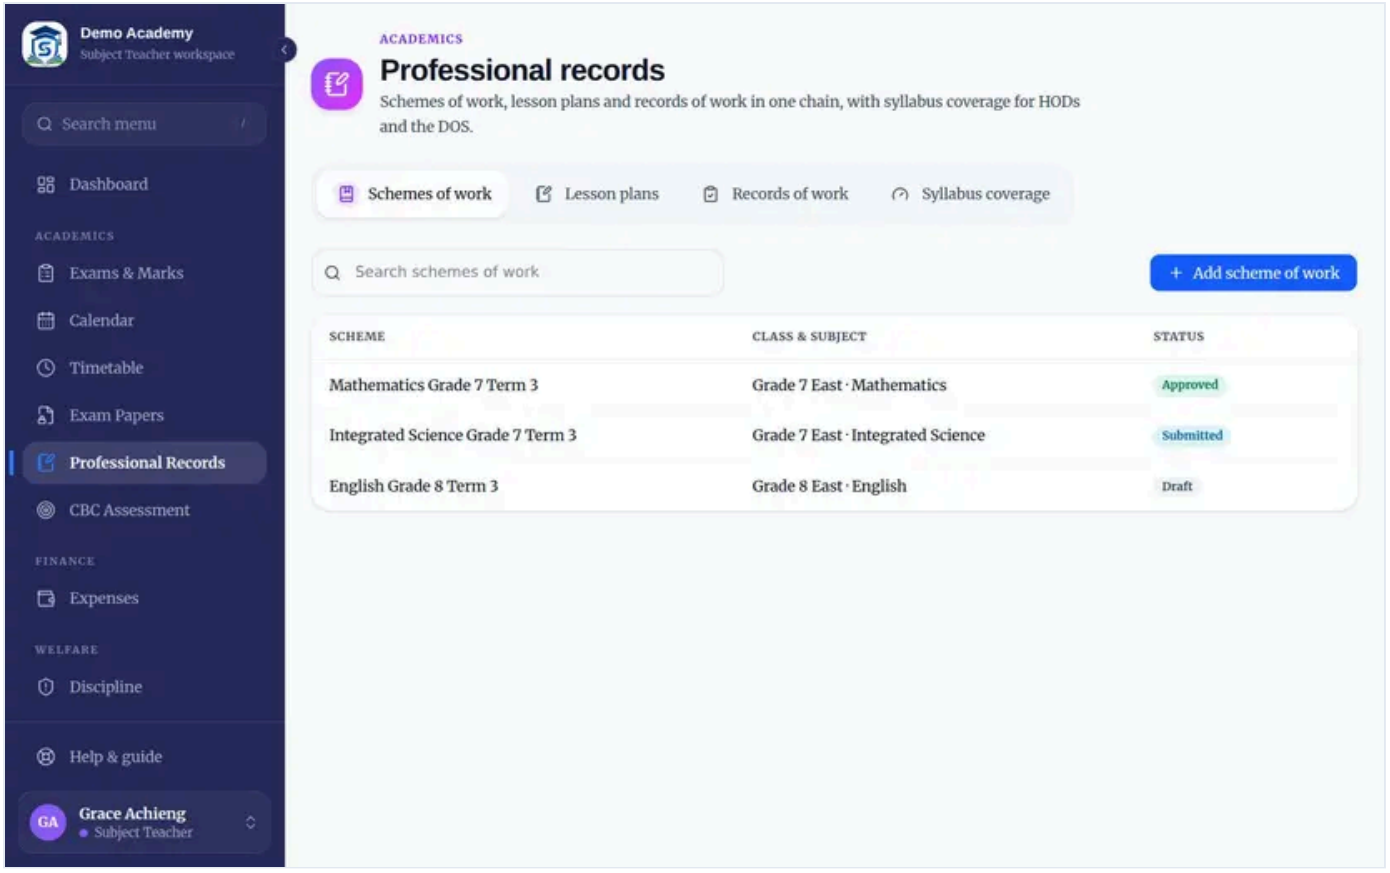

2. **Submit it**
   Open the paper and submit it for moderation. Its status changes from Draft to Submitted.

3 **Act on comments**
If it comes back Returned, read the moderator's comment in its History, replace the files and submit again. Once Approved it is locked for printing.

- Papers open stamped with the viewer's name and the time, and every download is logged, so leaks can be traced.
- Past papers are available once released, for revision.

6.2 Schemes of work, lesson plans and records of work

Professional Records keeps your schemes of work, lesson plans and records of work together, and works out how much of the syllabus each class has covered.

Professional records → Schemes of work.

1 **Write a scheme of work**
Press "Add scheme of work", choose the class, subject and term, then fill in the weeks: each lesson with its topic or sub-strand and details. Set the number of teaching weeks and lessons a week.

2 **Draft with AI (optional)**
"Draft with AI" fills the rows with a suggested scheme from the topics you list. It replaces the rows below, so check and edit every row before saving.

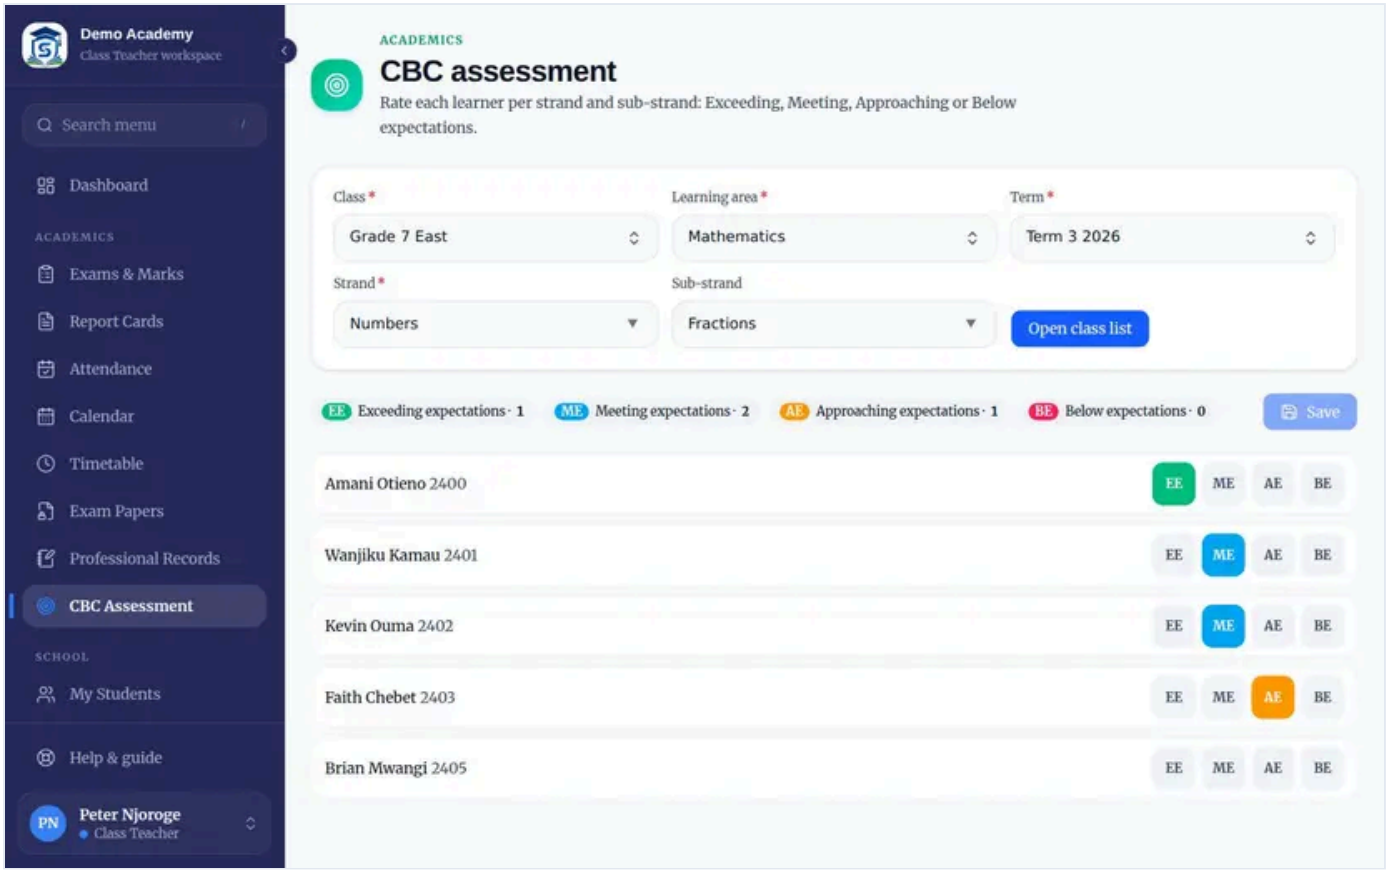

3 **Submit for review**
Save, then press “Submit for review”. Your head of department or the DOS approves it or returns it with a comment.

4 **Plan lessons**
Under Lesson plans, add a plan for a lesson: the date, topic, specific objectives, introduction, lesson development, conclusion, resources and your self-evaluation afterwards.

5 **Record what you taught**
Tick lessons as Taught inside the scheme, or add a record of work with the date, work covered and remarks. Both count towards syllabus coverage.

6.3 CBC assessment

CBC Assessment records each learner’s level for a strand and sub-strand: Exceeding (EE), Meeting (ME), Approaching (AE) or Below (BE) expectations.

CBC assessment: pick the class, learning area, term and strand, then rate each learner.

1 **Choose what you are assessing**
Pick the class, the learning area, the term, and the strand (for example Numbers) and sub-strand (for example Fractions).

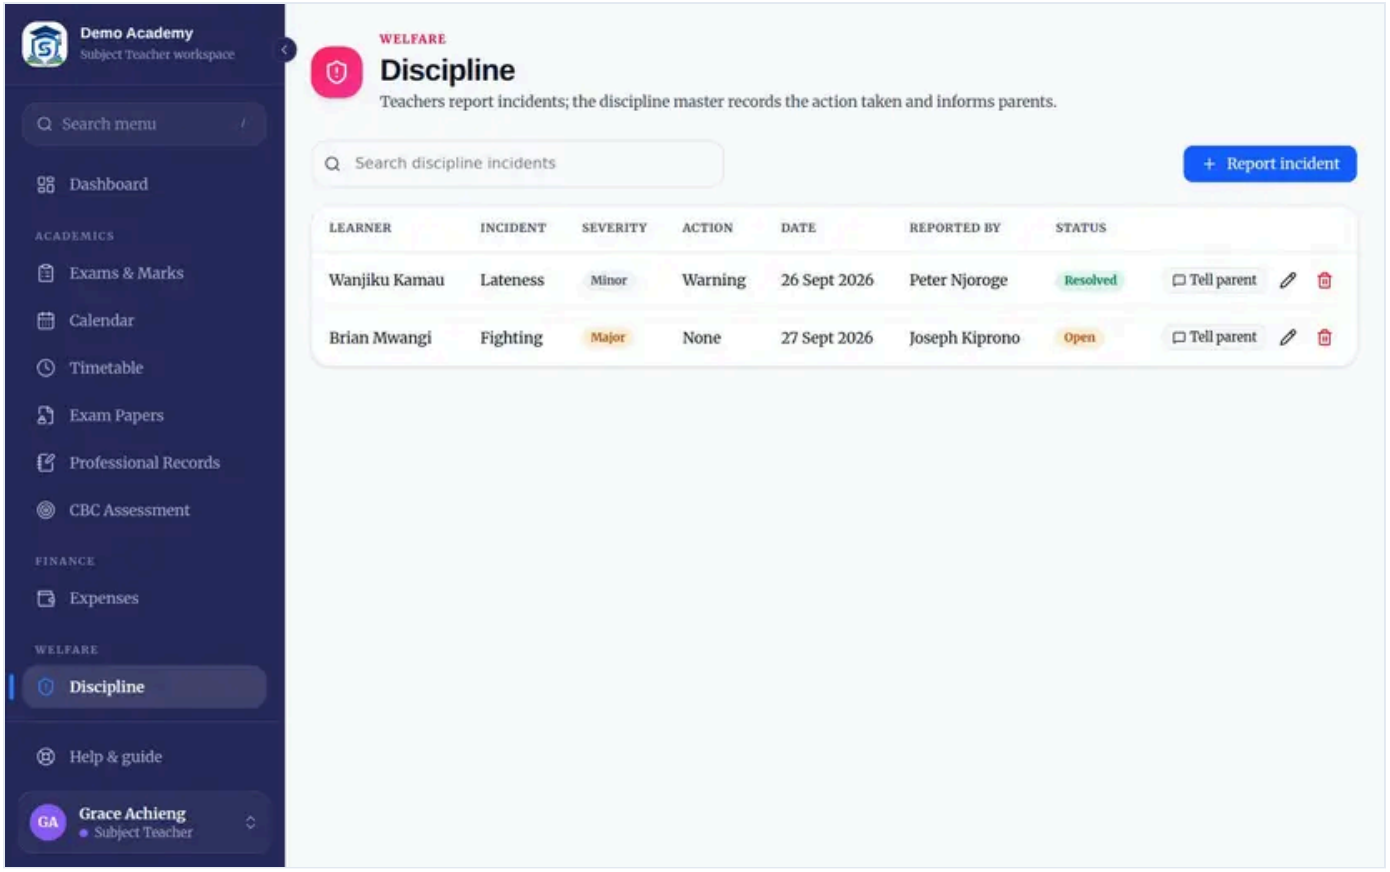

2 **Open the class list**
Press “Open class list”. Every learner in the class is listed.

3 **Rate each learner**
Tap EE, ME, AE or BE on each row and add a comment if you like. The totals at the top update as you go.

4 **Save**
Press Save. You can come back and change a rating later.

6.4 Report a discipline incident

Any teacher can report an incident on the Discipline page. You see the incidents you reported; the discipline master decides the action and tells the parent.

Discipline: each incident with its category, severity, action and status.

1 **Report it**
Press “Report incident”. Choose the learner, the date, the category (for example lateness or fighting), how serious it is (minor, major or critical) and describe what happened.

2 **What happens next**
The discipline master records the action taken (for example a warning, counselling or calling the parent in), marks it resolved, and can text the parent with “Tell parent”.

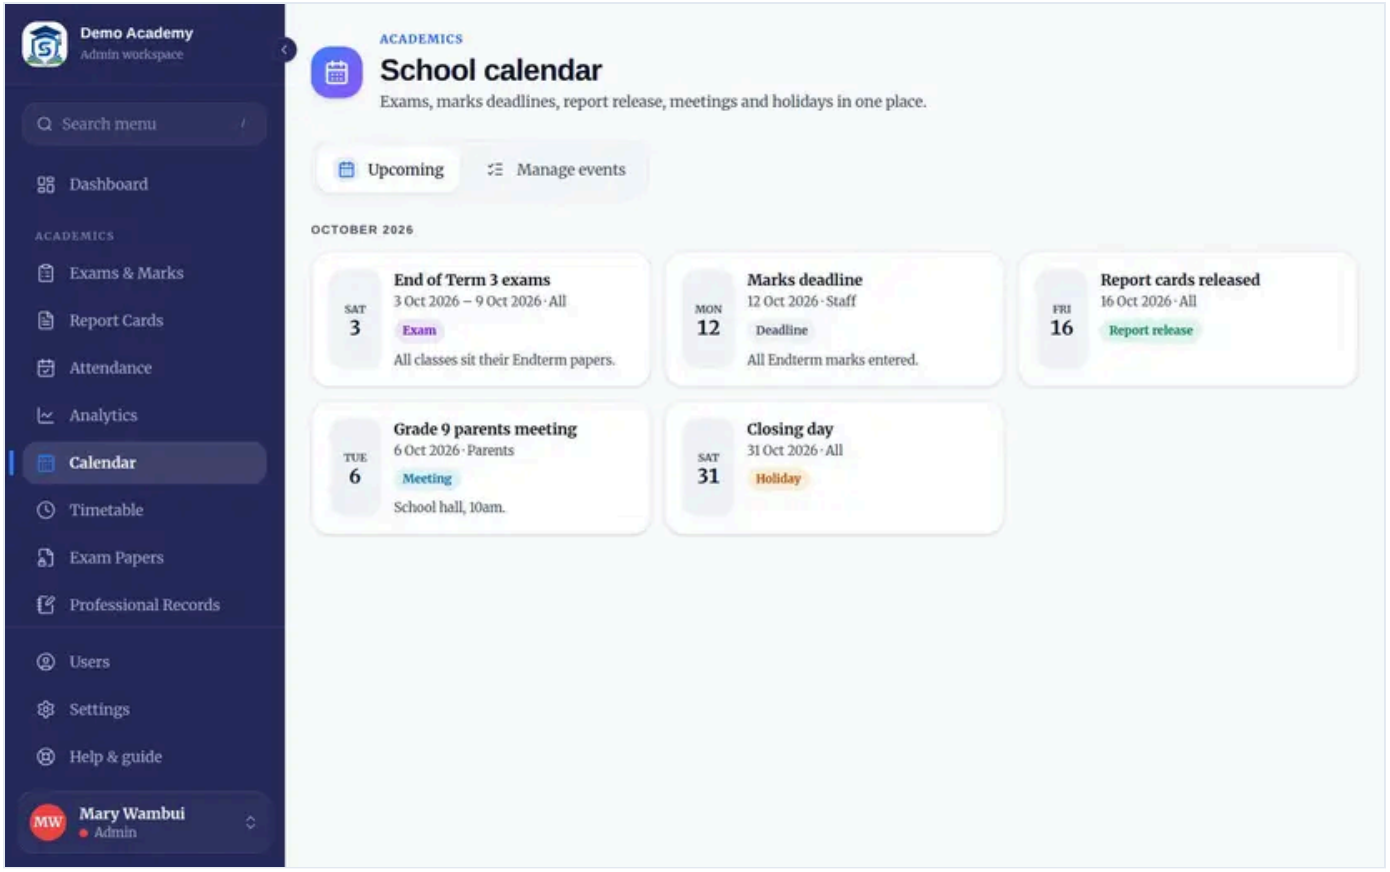

CHAPTER 7

Calendar, leave and requests

Tools every teacher has: the school calendar, your timetable, leave, and requests to the store and the bursar. You only see a page if your school has switched its module on and your role or duty uses it. If something here is missing from your menu, ask your administrator.

7.1 The school calendar

Calendar lists what is coming up across the school: exam windows, marks deadlines, report-card release dates, meetings and holidays. Everyone can read it; the DOS, deputy and principal add events.

Calendar → Upcoming: each event shows its date, who it is for and its type.

- Events are marked by type (exam, deadline, report release, meeting, holiday) and by who they are for: everyone, staff, learners or parents.
- Parents and learners only see events meant for them.
- To add an event (if you are allowed), open “Manage events”, press Add, and fill in the title, type, dates, who sees it and any details. An event can be linked to an exam.

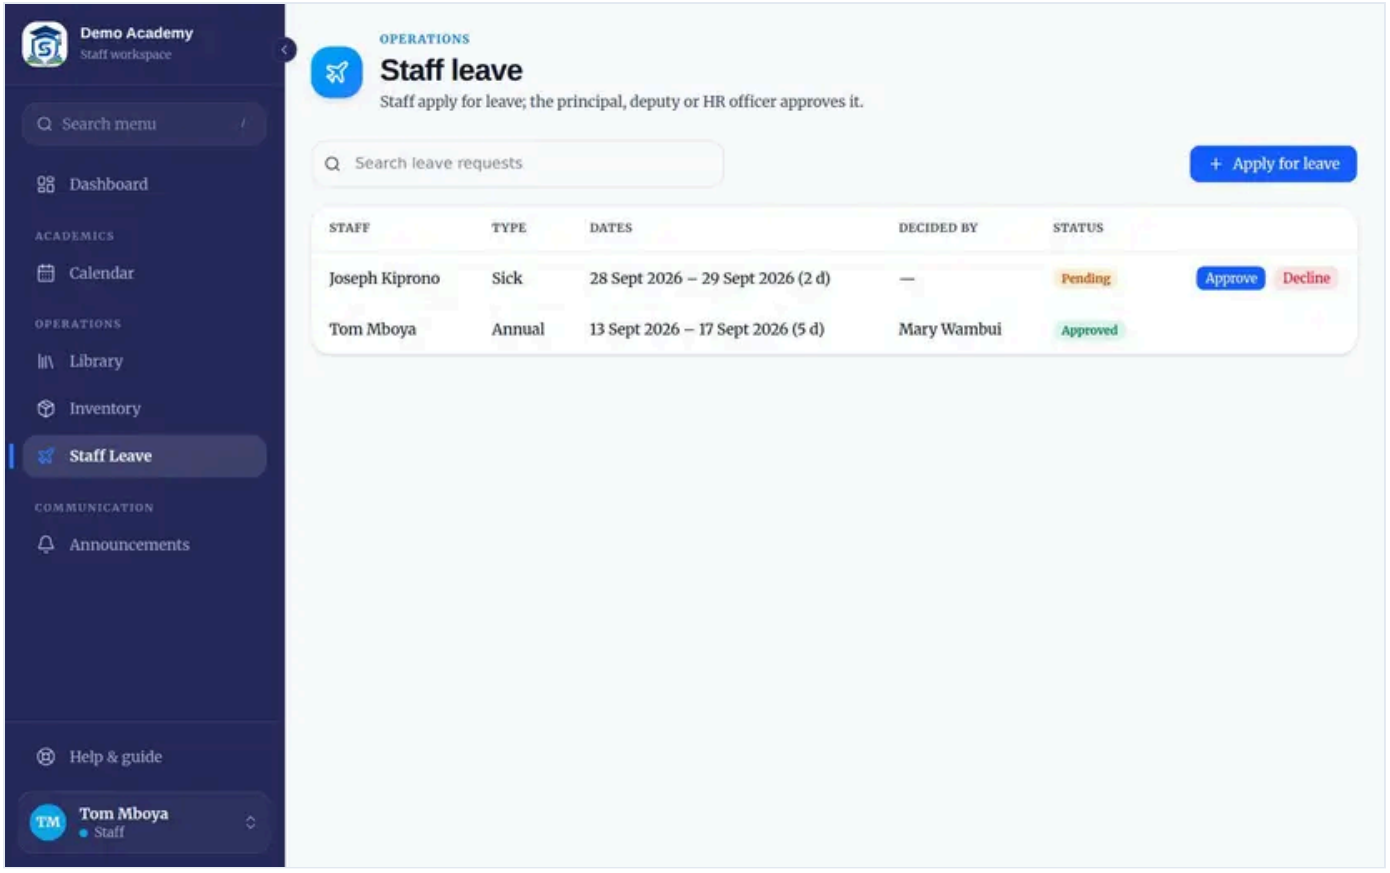

7.2 Your timetable

Timetable shows the published timetable for the week: the days down the side and the periods across, breaks shaded between them, each lesson with its subject, teacher and room. On a phone it shows one day at a time, starting with today. A period that runs only on some days (a ninth lesson on Friday) is shaded on the others.

- “Show” switches between your own timetable and any class, teacher or room.
- When a colleague is away and you are asked to cover a lesson, it is arranged under “Lesson cover”; check the timetable at the start of each day.

7.3 Apply for leave

Staff Leave is where you ask for time off. The principal, deputy or HR officer approves it, and you can see the decision on the same page.

Staff leave: your requests and their status. Approvers see Approve and Decline buttons.

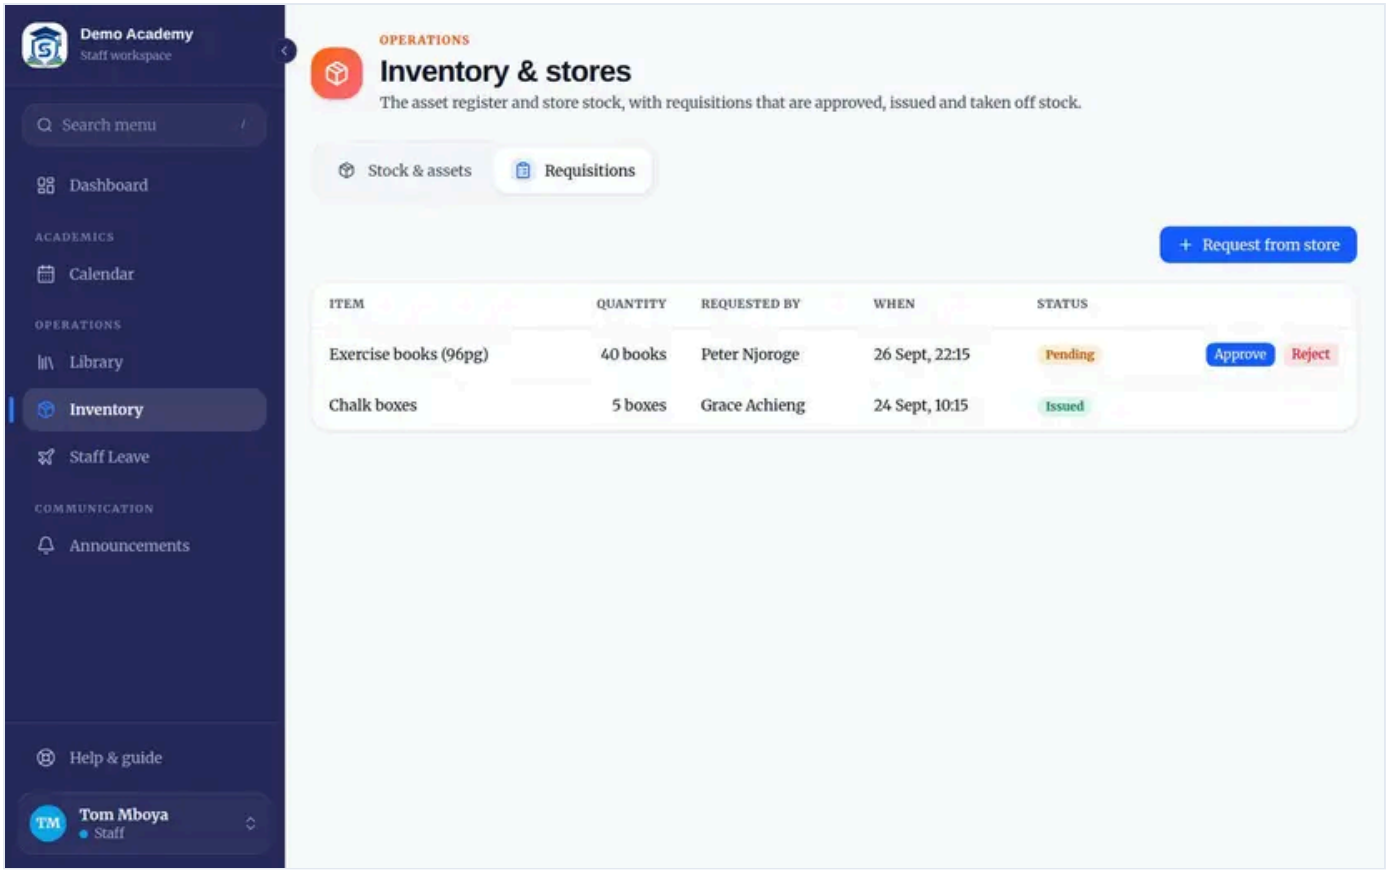

1. **Apply**
   Press “Apply for leave”. Choose the type (annual, sick, maternity, compassionate and so on), the first and last day, and the reason.

2. **Arrange cover**
   Under “Lessons and duties to cover”, say who will take your classes or duties, so the timetabler can arrange cover.

3 **Wait for a decision**
The request shows Pending until it is approved or declined. You can edit or cancel it while it is pending.

7.4 Ask the store for supplies

Inventory & stores → Requisitions is how you ask for exercise books, chalk, chemicals or equipment. The storekeeper approves the request and issues the items, and the stock count goes down automatically.

Requisitions: Pending until approved, then Issued when you collect them.

1 **Request**
Press “Request from store”, choose the item, the quantity and what it is for (for example “Grade 7 exam booklets”).

2 **Collect**
When the storekeeper approves and issues it, the status changes to Issued. Collect the items from the store.

7.5 Ask for money to be spent

Expenses → My requests lets any staff member raise a payment voucher, for example to buy lab chemicals or pay for printing. The bursar or principal approves it before it is paid.

1. **Raise it**
   Press “Record expense”. Say what it is for, the amount, the date, the supplier and the vote head, and attach the invoice reference.

2. **Follow it**
   It shows Pending, then Approved (waiting for payment) or Rejected, then Paid with the payment reference.

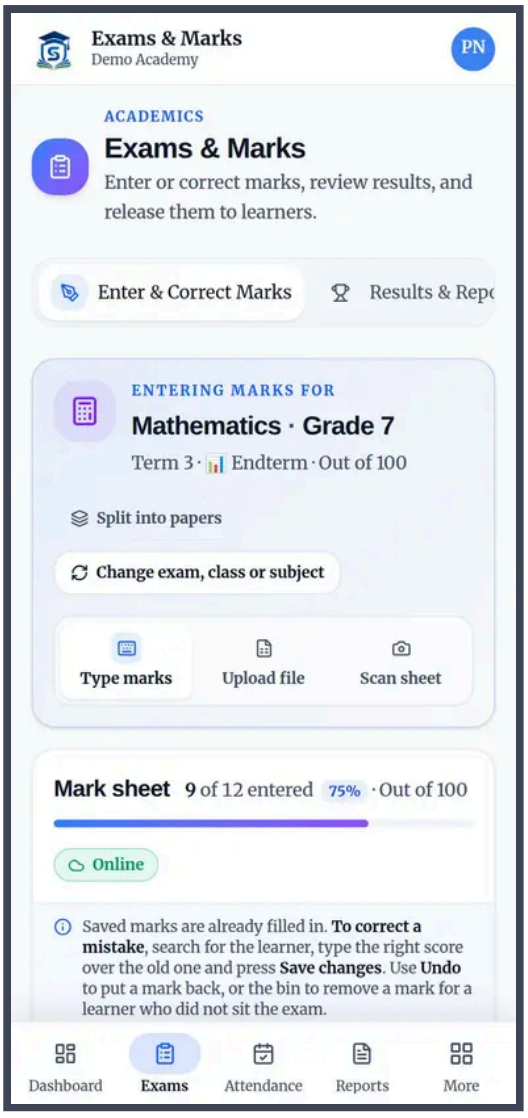

CHAPTER 8

On your phone

You can enter marks and take the register from a phone.

8.1 Using Skulbase on a phone

Every page works on a phone, in the browser or in the Skulbase app. Tables turn into cards, the main pages sit in a bar along the bottom, and everything else is under More.

Entering marks on a phone. The bottom bar holds Dashboard, Exams, Attendance and Reports.

- In the browser, use a current version of Chrome, Safari or Samsung Internet, and save skulbase.com to your home screen.
- The Skulbase app signs in with the same account and shows the same pages. More lists every other page in one grid, with a search box to find one by name.

- The app updates itself in the background. When an update is ready it offers “Restart now”; otherwise it opens the next time you start the app. Profile → “Check for updates” fetches the latest at any time.
- Mark entry keeps your work on the phone if the network drops, and saves it when you are back online.
- Downloads such as report cards, receipts and statements open in your phone’s PDF viewer, ready to share on WhatsApp or print.

CHAPTER 9

Getting help

Most questions are answered on the page itself: many pages have a “How to” panel at the bottom. For anything else, these are the places to go.

9.1 Where to get help

This guide is always available from Help in the menu, and as a PDF you can download and print.

- Your school administrator can add or reset accounts, fix classes and subjects, and change school settings.
- For problems with Skulbase itself, use the contact page at skulbase.com/contact, or call 0740 129 444.
- When you report a problem, say which page you were on, what you pressed and what you expected. A screenshot helps.
